CERTIFIED MAIL

December 10, 2001

City of Hoonah
Carl Oliver
PO Box 360
Hoonah, Alaska 99829

The Department of Environmental Conservation has completed its evaluation of your request for a solid waste disposal permit, to allow for the operation and maintenance of a Class III municipal solid waste landfill near Hoonah, Alaska in Township 43 S, Range 61 E, Section 26, Copper River Meridian. The Department is issuing this permit in accordance with AS 46, 18 AAC 15, and 18 AAC 60. Please review the conditions and stipulations in the permit and ensure they are all understood. This permit is effective upon issuance and expires **December 10, 2006**.

Any person who disagrees with this decision may appeal the decision by requesting an adjudicatory hearing, using the procedures contained in 18 AAC 15.200-310. Hearing requests must be delivered to the Commissioner of the Department of Environmental Conservation, 555 Cordova Street, Anchorage, Alaska 99501, within 30 days of receipt of this letter. If a hearing is not requested within 30 days, the right to appeal is waived and the decision becomes final.

Sincerely,

Heather T. Stockard
Solid Waste Program Manager

SOLID WASTE DISPOSAL PERMIT

Permit: 9911-BA007

Date: December 10, 2001

This Solid Waste Disposal Permit is issued to the City of Hoonah for the operation and maintenance of a Class III Municipal Solid Waste Landfill located approximately 1.7 miles east of Hoonah on the White Alice Road, located in Township 43 S, Range 61 E, Section 26, Copper River Meridian. This permit is subject to the conditions and stipulations contained in Appendices A and B, which are incorporated herein by reference.

This permit is issued under provisions of Alaska Statute 46.03, the Alaska Administrative Code, as amended or revised, and other applicable State laws and regulations.

This permit is effective upon issuance and expires **December 10, 2006**. It may be terminated or modified in accordance with AS 46.03.120.

Heather T. Stockard
Solid Waste Program Manager

APPENDIX A - SPECIFIC CONDITIONS**I. SITE DEVELOPMENT**

The permit holder shall:

- A. Comply with the designs and plans submitted in the application on September 24, 1999 and in additional information submitted November 2, 2001, as well as the following permit conditions. Additional modifications may be requested, but must be authorized by a permit amendment, before that modification is effective.
- B. Ensure that all operations will accommodate the waste volume and are done in a manner that will facilitate landfill closure.
- C. Ensure that surface water runoff from outside the facility does not flow onto the facility and over, into, or through uncovered or covered solid wastes by maintaining the existing diversion structures.
- D. Erect and maintain a readily visible sign at the site currently in use with the following information legibly printed:

Facility Operator Identification
Operator/Owner Name
Conditions for Use
Emergency Phone Numbers

- E. Erect and maintain a sign at the entrance to the site that lists items that may not be disposed of there such as: acids, corrosives, solvents, oily wastes, explosives, hazardous wastes, radioactive wastes, or unsterilized medical waste.
- F. Erect and maintain readily visible signs in the facility directing users to the various disposal areas (e.g., the active disposal area working face, the salvage area, or the animal waste disposal area) and listing pertinent rules for public use.
- G. Ensure that the site is managed in such a way as to prevent attracting wildlife, or domestic animals to the facility.

II. SITE OPERATION

The permit holder shall:

A. General Operating Procedures

- 1. Ensure that only domestic and commercial solid waste, construction and demolition wastes, and ash are disposed of at this site.
- 2. Maintain any salvaging activity in a controlled designated salvage area. The area will be cleaned up on an annual basis and unused materials placed in the active cell area for disposal. Salvage area cleanups will be conducted on a more frequent basis if the area becomes a litter, nuisance or safety problem.
- 3. Ensure that the public is made aware of the rules and operations plan for the landfill. Control public access to the site, as necessary, to reduce risks to public health and safety.

B. Animal/Fish Waste

1. Ensure that animal and fish wastes will be placed in an area designated for their disposal at the site.
2. Ensure that animal and fish wastes are coated with a thin layer of hydrated lime and covered immediately with at least six inches of soil after each disposal.
3. Maintain a container and supply of hydrated lime near the animal/fish waste disposal area for use by the operator to treat waste placed at the site.

C. Burial

1. Compact and cover wastes as necessary.
2. Ensure the working face is kept as small as practical to reduce the potential for windblown litter and for the attraction of birds and animals.
3. Ensure that solid wastes will not be placed in surface waters.
4. Ensure that waste oils or oily wastes are managed in accordance with 40 CFR 279. Oil filters must be hot drained and crushed or incinerated prior to disposal.
5. Ensure that all large containers (e.g., cleaned barrels or drums) are crushed and flattened to prevent voids in the fill. Ensure that all nonsalvageable drums are empty of fluids prior to crushing and burying. All fluids removed from drums will be properly disposed of in accordance with all applicable State and Federal laws, including but not limited to, RCRA, the Clean Water Act, the Clean Air Act, Title 46 of Alaska Statutes and 18 AAC 60.
6. Maintain a separation distance of 75 feet between the waste management area and the property boundary.
7. Ensure that scrap vehicles or automobiles have been drained of all petroleum products and coolants, and the lead-acid batteries have been removed prior to disposal at the site.

D. Burning

1. Prohibit open burning on the working face and immediately extinguish any fires that occur on the working face.
2. Notify the Department of Environmental Conservation, Juneau Office, at 465-5350 within 24-hours of a fire, if any fires occur on the working face.
3. Allow controlled open burning of wastes that do not create black smoke, in the designated trench only.
4. Ensure that an attendant is on duty when waste is burning.
5. Remove ash from the trench daily to be buried on the working face.
6. Implement a waste separation plan, as necessary, to ensure the best combustion efficiency for the waste being burned and prevent black smoke.

E. Access

1. Maintain on-site roads as necessary to ensure adequate traffic control. Adequate traffic control means that the site supervisor will maintain positive control of all persons who are within the landfill boundaries, and that refuse will be deposited in approved locations. Dumping in unauthorized areas violates conditions of this permit and Alaska Administrative Codes.

F. Litter

1. Collect all windblown and littered refuse from the disposal site and along the entrance road at least **once each month** and return it to the trench for burning and burial.

G. Snow Control

1. Remove snow where possible from the disposal cell operations area prior to winter compaction operations and spring snowmelt.
2. Deposit any snow removed in an area away from the landfill working face within the landfill and clean up any accumulated litter in that area after the snow melts.

III. PROHIBITIONS AND SPECIAL RESTRICTIONS

The permit holder shall:

- A. Prohibit discharge of firearms at the facility.
- B. Prohibit disposal of regulated asbestos containing material at this site. Non-regulated asbestos containing material may be disposed of on a case-by-case basis, with written approval of the ADEC Juneau office, if the site is in compliance with the requirements of 18 AAC 60.490 a (1-3).
- C. Prohibit disposal of hazardous wastes, as defined in 40 CFR 261.3, oily wastes, waste oil, greases, paints, sludges, and chemical wastes at this facility.

- D. Prohibit disposal of lead-acid vehicle batteries at this site. Batteries may be stored temporarily in a designated area in covered, leak-proof storage containers prior to their transport to a recycler or permitted disposal site.
- E. Prohibit storage of used oil, or antifreeze or other bulk liquids at the landfill site. Used oil and other hazardous bulk liquids must be stored in a bermed and lined area located away from the landfill facility.
- F. Prohibit disposal of contaminated soil unless given prior approval from the Department.
- G. Prohibit the disposal of unsterilized medical waste. Medical waste must be decontaminated or sterilized, and packaged to prevent a health hazard before disposing of in the landfill.
- H. Prohibit the disposal of bulk liquids at the site. Containers being disposed of must hold one gallon or less of liquid.

IV. MONITORING AND REPORTING

The permit holder shall:

- A. Visually monitor the site each month for signs of damage or potential damage to any part of the facility due to settlement, ponding, leakage, frost action, or erosion. The visual inspection should include observations for any violations of the permit conditions for the facility. **Retain the results of visual monitoring in the operating record for the facility for review by employees or by ADEC during inspections.**
- B. Maintain an Operating Record in a readily accessible place in the community or at the landfill containing:
 - 1. A copy of the permit application.
 - 2. A copy of the solid waste disposal permit.
 - 3. Operating plans described in 18 AAC 60.210(b)(9).
 - 4. Monthly visual monitoring records.
 - 5. Staff training records (e.g. landfill operations, safety).
 - 6. Records of the volume of wastes received at the landfill showing how the facility meets Class III criteria (i.e. less than 5 tons/day).
 - 7. Site map showing how the landfill meets location restriction demonstrations for minimum distance to runways or flood plains.
 - 8. Annually updated as-built drawings of the landfill.

V. CLOSURE AND RESTORATION

The permit holder shall:

- A. Notify the Department's Juneau Office at least thirty (30) days before the site is to be permanently closed and the equipment withdrawn.
- B. Follow the closure plan as approved by the Department.
- C. Ensure that a final cover is applied within ninety (90) days after the last waste is deposited, and consists of a minimum of two feet of material. The top six inches will consist of soil, which will promote adequate water retention for the successful revegetation of the site with native vegetation or grasses.
- D. Ensure that the covered areas and drainage control structures are graded to promote and maintain surface water runoff, to prevent ponding and erosion, and to minimize the amount of water entering the solid waste.
- E. Develop and implement a vegetative cover plan for completed areas within the first growing season after closure, using plant species recommended by the Alaska Plant Material Center (907) 745-4469.
- F. Prepare a survey as-built or record drawings showing the location, volume and type of waste deposited at the solid waste disposal site, and a legal description of the landfill property which would be found during a title search. Submit the as built to the ADEC Solid Waste Program, Juneau Office, within sixty (60) days of the final closure or expiration date of this permit.
- G. Within sixty (60) days after the entire facility is permanently closed to landfilling, file the survey as-built or record drawings of the area used as a landfill with the State Recorder's Office or other appropriate land records office approved by the Department. At the same time, file a notation informing future property owners that use of the land may not disturb the integrity of the final cover, cap, or other structures or devices installed as part of closure, unless approved by the Department. Submit proof of these recordings to this Department.
- H. Visually inspect the site annually during the spring, for at least 5 consecutive years following closure, to check for signs of damage from settlement or erosion. Maintain a record of the visual inspections documenting any problems and repairs, as necessary and maintain these reports in the operating record for the facility.
- I. Notify the Department at the end of the 5-year post-closure period with a description of the conditions at the site and photographs of the closed landfill area.

APPENDIX B - GENERAL PERMIT CONDITIONS**I. ACCESS AND INSPECTION**

The permittee shall allow the Commissioner or her/his representative access to the permitted facilities at reasonable times to conduct scheduled or unscheduled inspections or tests to determine compliance with this permit, State laws, and regulations.

II. INFORMATION ACCESS

Except for information relating to confidential processes or methods of manufacture, all records and reports submitted in accordance with the terms of this permit shall be available for public inspection at the State of Alaska Department of Environmental Conservation, Fairbanks Office, 610 University Avenue, Fairbanks, Alaska 99709-3643.

III. CIVIL AND CRIMINAL LIABILITY

Nothing in this permit shall relieve the permittee from civil or criminal penalties for noncompliance, whether or not such noncompliance is due to factors beyond his control, including, but not limited to, accidents, equipment breakdowns, or labor disputes.

IV. AVAILABILITY

The permittee shall post or maintain a copy of this permit available to the public at the disposal facility.

V. ADVERSE IMPACT

The permittee shall take all necessary means to minimize any adverse impacts to the receiving waters or lands resulting from noncompliance with any limitation specified in this permit, including any additional monitoring needed to determine the nature and impact of the noncomplying activity. The permittee shall cleanup and restore all areas adversely impacted by the noncompliance.

VI. CULTURAL OR PALEONTOLOGICAL RESOURCES

Should cultural or paleontological resources be discovered as a result of this activity, work which would disturb such resources is to be stopped, and the State Historic Preservation Office, Division of Parks and Outdoor Recreation, Department of Natural Resources, is to be notified immediately (907-269-8721).

VII. APPLICATIONS FOR RENEWAL

In accordance with 18 AAC 15.100(d), applications for renewal or amendment of this permit must be made no later than thirty (30) days before the expiration date of the permit or the planned effective date of the amendment.

VIII. OTHER LEGAL OBLIGATIONS

The requirements, duties, and obligations set forth in this permit are in addition to any requirements, duties, or obligations contained in any permit that the Alaska Department of Environmental Conservation or the U.S. Environmental Protection Agency has issued or may issue to the permittee. This permit does not relieve the permittee from the duty to obtain any and all necessary permits and to comply with the requirements contained in any such permit or with applicable state and federal laws and regulations. All activities conducted by the permittee pursuant to the terms of this permit and all plans implemented by the permittee pursuant to the terms of this permit shall comply with all applicable state and federal laws and regulations.

IX. POLLUTION PREVENTION

In order to prevent and minimize present and future pollution, when making management decisions that affect waste generation, the permittee shall consider the following order of priority options: waste source reduction; recycling of waste; waste treatment; and waste disposal.
